# Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

### NAMES AND LABELS

⚠ Form elements do not have associated labels                                          ⌄

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

### ADDITIONAL ITEMS TO MANUALLY CHECK (10)                                Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

### PASSED AUDITS (17)                                                      Show

### NOT APPLICABLE (41)                                                     Show
